

EvoWeb Pointers Customer

- The system is based on all frames being viewed from the INSIDE.
- Similar to all other internet-based applications, EvoWeb times out after a period of non-usage. Be careful when processing a quote/order – if you see yourself being interrupted, be sure to save your work-to-date for re-commencing at a later stage.
- Only one person can access your account at any given point in time.
- Changing mark-up levels and glass costs will change all enquiries logged on the system, so take care.
- Do not order angled frames or arched head frames through EvoWeb; rather order them in the usual fashion.
- The only options for glazing types are those listed – no other options will be made available.
- No panel options are available.
- There is currently no way of designing a frame and adding a dummy transom/mullion. Only those designs with dummy transom/mullion that are pre-listed are available.
- Vertical Sliders will show as an option – these are unavailable until further notice.
